ShipEasy Platinum Web is the industry's first and only multi-carrier hazmat enabled web solution.

SEPW is loaded with regulatory logic to ensure that shipments are always in compliance. It is designed to comply with DOT and IATA regulations and it has an extensive feature set . It generates all the electronic information required by FedEx and UPS. It generates all required hazmat shipping documents in PDF. It can access from anywhere at any time using an internet browser. All carrier mandates and government compliance are accurately enforced. It displays all the alerts and messages necessary to assist the shipper in making the right decisions.

Eliminate unnecessary steps from your hazmat process by using SEPW, a solution that takes the burden of compliance away and let shippers focus on growing their businesses.

HAZMAT
SOFTWARE

ShipEasy Platinum Web

THE HAZMAT ENABLED WEB SITE

SEPW provides fast access to critical compliance information anywhere, anytime. Shippers can provide their employees a solution that it is easy to use and accurate. It is an essential business tool that increases safety, reduces returned shipments and decreases costly errors. Using the 49 Code of Federal Regulations and the International Air Transport Association Dangerous Goods Regulations it checks compliance for ground and air shipments. Critical compliance information at your fingertips.

UPS and FedEx sometimes place even stricter mandates than those found in the regulations. SEPW enforces all those mandates when most needed, at shipping time.

Shipper can use SEPW to do preliminary compliance checks even before deciding to sell the product. SEPW provides extensive compliance information for shippers to make those decision.

All Packed In One
Overpacks
Limited Quantities
Reportable Quantities
Excepted Quantities

WHY YOU NEED COMPLIANCE

Government regulations and carrier mandates are changing at a fast pace in this post 911 era. More shippers are affected by regulatory changes now than ever before by an ever increasing barrage of regulations. Carriers expect shippers to comply and are demanding that shipments are checked for compliance and the shipping papers generated with a compliance checking software. Some more reasons why you need compliance.

- ✓ To reduce the chance of fines.
- ✓ To guarantee package compliance.
- ✓ To streamline the hazmat shipping process.
- ✓ Eliminate redundant data checking.
- ✓ To make just-in-time decisions.
- ✓ To ensure the correct regulation is used

SHIPPER RESPONSIBILITY

As a shipper of a potentially dangerous material it is your responsibility to properly classify, package and label a hazmat package. You are required to provide fully compliant shipping papers.

HAZMAT DATA

Shipper of hazardous materials need the latest regulatory data from the government and carriers to make shipping decisions. SEPW provides constantly updated regulatory data.

GROUND SHIPPING

All HAZMAT ground shipments within the United States fall under the US DOT regulations for Hazardous Materials (49 CFR Subchapter C). SEPW is 49 CFR Compliant.

CARRIER MANDATES

Carriers require special labels to be printed and placed on every box that contain dangerous goods. Critical information such as Proper Shipping Name, UN Number, Packing Group and both Hazard Class and Subsidiary Hazard Class as well as the Packing Labels required by the carriers are printed on the label by SEPW.

PEACE OF MIND

Shippers can rely on a service that is always current with the latest regulations. Hazmat trained compliance developers and hazmat certified consultants work year round to ensure that SEPW is always up to date with the latest regulations.

AIR FREIGHT

Air freight is more stringent than ground freight and shippers must use an 85 point checklist to qualify hazardous materials prior to transfer to the airline. SEPW reduces the burden by checking most of the requirements

INTEGRATION

ShipEasy Platinum Web can be integrated with virtually any software solution. Our focus was to develop a streamlined hazmat enabled solution that could be integrated, tested and implemented in less than two weeks by one developer.

CLOUD HOSTED ENGINE

ShipEasy Platinum Web is hosted in the EC2 Cloud. In the cloud SEPW becomes scalable and secured. Scalability is automatic , as your volume increases you will enjoy the same performance and response times.

PAY PER USE

ShipEasy Platinum Web is a pay per use web service. You only pay for the shipments you send and the higher the volume the lower the cost. No software to buy.

ANNUAL SUBSCRIPTION

ShipEasy Platinum Web is subscription service. If you ship frequently the annual subscription saves you money by giving you unlimited
